DOOR HOLDER

Fire Protection for the most vulnerable

Door holders are used on swinging self-closing doors. These can be found in hospitals, schools, nursing homes as well as other public buildings and are used to automatically isolate an area in case of fire. Since these are very sensitive places, a reliable door holder is key.

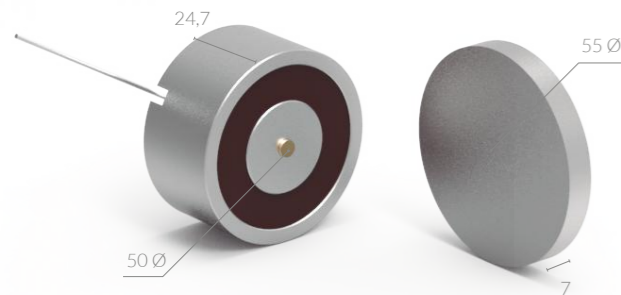

These doors are heavy fire-blocking doors that are kept open and closed only during emergencies. To add an extra layer of safety magnetic door holders have a holding force of 600 N and a manual red switch which allows for instant closing of the doors.

Accredited with EN 1155: 1997 certificate

DHI Industrial

Holding force:	600 N
Voltage:	24 V DC
Consumption:	85 mA

DHS Basic

Holding force:	600 N
Voltage:	24 V DC
Consumption:	85 mA

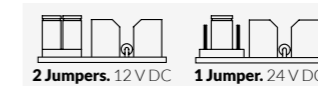

DHT With timer

Holding force:	600 N
Voltage:	24 V DC
Consumption:	85 mA
Timer:	3 s

DHB Dual voltage

Holding force:	600 N
Voltage:	12 V DC 24 V DC
Consumption:	170 mA 85 mA
With jumper for	Dual voltage

DHD With power-regulation

Holding force:	300 N 600 N
Voltage:	24 V DC
Consumption:	85 mA
